

JANOME

Memory Craft 9500

Create Your Own Style

Sewing and Embroidery With Style

If you want your creations to look their best, you want Janome.

The Memory Craft 9500 brings together all your favorite sewing and embroidery features in one hard-working machine, combining the power and precision of a superior stitch mechanism with the sophistication of computerized Touch Screen control. From embellishment with decorative stitches and delicate heirloom work, to creative quilting and clothing construction, your sewing projects will go smoother and look better. When you're ready to switch to embroidery, forget about those bulky attachments many competitors' machines require. Simply touch the Embroidery mode key, attach the correct presser foot, and you're ready to enter the world of Professional-Style Embroidery. Bring in designs from a variety of sources. Edit, combine and add lettering right on screen. Then stitch out your design with legendary Janome stitch quality. Looking good with a minimum of effort ... that's *true style*.

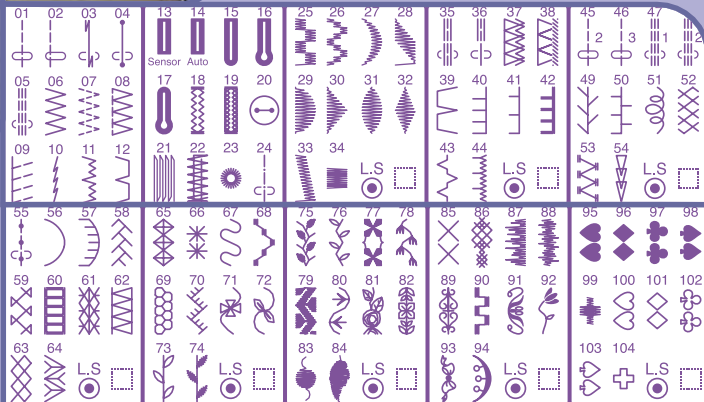

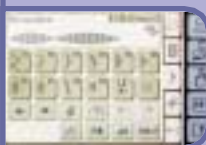

« SAY GOODBYE TO BULKY ATTACHMENTS

Janome Memory Craft Embroidery machines never require a separate embroidery attachment. Many competitors' machines have attachments that take up to half a dozen steps just to convert to embroidery. The MC9500 has just 2 steps: push the Embroidery mode key, attach the embroidery foot, and you're ready to stitch. Our patented telescopic carriage arm allows the hoop to move forward, backwards and side-to-side with tremendous flexibility.

Decorative Stitching

Switch to Ordinary Sewing mode and you're ready to add unique embellishment with a huge selection of decorative stitches. Elongate and combine stitches, or set up a stitch for flawless twin-needle work. You can even save your favorite stitch combinations in the built-in Memory banks.

You'll Never Run Out Of Designs

Built-in designs, PC Design Cards, Memory Cards, downloading... your options are unlimited.

» USE OUR PC DESIGN CARD LIBRARY

Get hundreds of images especially digitized for Janome quality embroidery. Each optional PC Design Card is on a high capacity Flash Memory Card with designs ranging from classic florals to whimsical children's designs. View all the design menus at www.janome.com. Current Design Cards are also available on CD ROM to use with your Janome software to manipulate or combine designs in your computer.

» JANOME SOFTWARE

Easy-to-use Janome software programs, like Customizer 10000 Plus and Digitizer 10000, give you the tools you need to create your own digitized embroidery designs. And like our machines, our optional software technology is intuitive and flexible. No stacks of manuals or lengthy tutorials required. Just click to create.

» GET A BUILT-IN ATA PC CARD SLOT

The ATA PC Card (also known as "Compact Flash with Type II Adapter") is much more reliable and faster than a floppy disk. In fact, most computer makers have begun phasing out the floppy in favor of the ATA PC Card. Old-fashioned floppies can hold only a few dozen small designs. By contrast, your MC9500 can read up to 100 designs saved into its designated folder on an ATA PC Card.

« 90 BUILT-IN DESIGNS, INCLUDING 10 LARGE SCALE DESIGNS

To get you started, we've loaded the MC9500 with dozens of our most popular designs, including 10 specially formatted to fill the Large Hoop.

« DOWNLOAD DESIGNS FROM THE INTERNET

There are lots of sites on the Internet offering copyright-free designs in the Janome .jef and .sew formats. Download these, or digitize designs yourself with Janome software. Just transfer the designs to an optional ATA PC Card to load them into your machine.

« USE YOUR FAVORITE CLASSIC MEMORY CARDS

With the optional Card Reader 10000, your MC9500 can read designs from our large collection of Memory Cards (#102 and up).

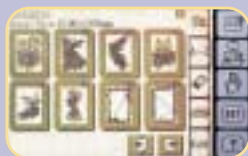

Easy, Built-In Design Editing

Creating unique embroidery design combinations is so simple with the MC9500. Just touch, drag and drop. If you can point, you can use even our most advanced on-screen editing functions.

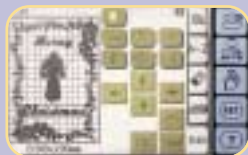

Bring in designs on PC Design Cards, ATA PC Cards...

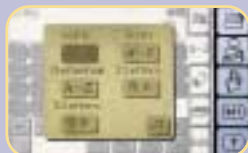

or select from 90 built-in designs: 10 designs for the Large Hoop, 60 designs for the Standard Hoop, and 20 combination designs.

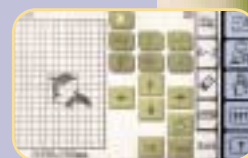

Combine designs and lettering, choosing from 3 built-in alphabets.

Or create beautiful monograms in 2 or 3 letter styles.

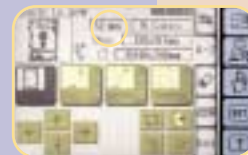

Rotate and resize designs, then move them around in the hoop outline to create your layout.

Automatically change colors to your favorite brand of thread: Janome, Robison-Anton, Madeira, or Mettler.

You're ready to sew! The screen tells you how many minutes your embroidery will take.

Save your design file for later use.

» EMBROIDERY HOOPS INCLUDED

Select your hoop size right on screen. Both the Standard and Large hoops are included with the MC9500, giving you up to 5.5" x 7.9" of embroidery area. Of course, with the exclusive Janome Clothsetter, your designs aren't limited by hoop size. You can make embroidered designs of virtually any size with the help of the Clothsetter's exact placement. No other brand of embroidery machine allows you to design with such confidence and precision.

Optional Clothsetter

» UPDATE YOUR MACHINE THROUGH SOFTWARE

You can update the software in your MC9500! This means that when Janome releases new stitches, new screens or other feature modifications, you will be able to add these free or low-cost updates right into the memory of your machine. It's like getting a new machine!

JANOME

Bringing It All Together

The Memory Craft 9500 is designed to give you all the possibilities of Professional-Style Embroidery while making regular sewing a breeze. Everything you need is displayed on the crystal-clear, backlit LCD screen. And because it's a Janome, you know it will be easy-to-use right out of the box.

≈ EASY OPERATION THROUGH THE BACKLIT LCD TOUCHSCREEN

The large, bright Touch Screen (4.7" diagonal) has the same user-friendly navigation as our top-of-the-line Memory Craft, with easy menus and instructions. Choose your stitch, set the width and length, and the onboard computer automatically sets your tension. In Embroidery mode, the screen allows you to see how your design will look in the hoop. Everything you need is done with the touch of a key. With the MC9500, every aspect of sewing and embroidery is easier with better results.

≈ DO DETAILED EMBROIDERY LAYOUTS WITHOUT A COMPUTER

Put a Janome PC Design Card in your MC9500 or bring a design over from your computer on an ATA PC Card. Touch a key to choose your embroidery hoop. Touch another key to import multiple designs. Add lettering, rotate, resize, and position everything within the hoop outline. Select which brand of embroidery thread you use: the MC9500 can specify color numbers for 4 top embroidery threads. That's it. You're ready to embroider!

≈ THE BEST FEATURES FOR FLAWLESS SEWING

Start with an extensive stitch package of decorative and utility stitches. Add the ability to combine and save these stitches into your own unique patterns. Include seven automatic buttonholes and a host of specialty features, like an automatic needle threader, twin needle guard and automatic thread tension control.

Put it all together and what do you get? The Memory Craft 9500 — the perfect choice for superior sewing.
